Email: arjun.chandroth.work@gmail.com
Mobile: +91-9895063272

SKILLS

• Languages:	HTML, CSS, Python, C++
• Robotics & Systems:	ROS2, RViz, Arduino/Hardware, System Architecture
• Embedded & Simulation:	MATLAB/Simulink, Keil uVision, Proteus, Arduino IDE, XGPRO
• CAD & Mechanical Design:	AutoCAD, CATIA, Onshape, CREO, SolidWorks, Fusion 360
• Soft Skills:	Team Leadership, Public Speaking, Problem-Solving, Adaptability

EXPERIENCE

Aersense Labs <i>Systems Engineer</i> Supporting hardware–software development, integration, and optimization across embedded systems. ◦ Contributing to cutting-edge sensing and embedded systems for intelligent environments.	Feb'26-Present
Xiotz <i>Robotics and R&D Engineering Intern (Paid Internship)</i> Researched and developed multi-robot control architectures; work has been research-focused, with no systems deployed yet. ◦ Prototyped a unified multi-robot control architecture, later developed into the Unified Multi-Robot AI Control Platform.	Jan'25-Dec'25

PROJECTS

Unified Multi-Robot AI Control Platform <i>ROS2, YOLO, LIDAR, GPS, OpenCV, Python</i> Built a single intelligent system controlling humanoid, hexabot, quadruped, and mobile robots simultaneously. ◦ Integrated YOLO detection, dual camera feeds, GPS tracking, LIDAR visualization, and remote access. ◦ Designed a modular control architecture enabling synchronized command and monitoring of four distinct robot platforms. ◦ Built a centralized dashboard for real-time telemetry, video feeds, and remote operation across the robot fleet.	Mar'25-Ongoing
Disaster-Response Human Detection Device <i>DFRobot Sensors, Triangulation, Embedded Systems</i> Designed an autonomous device to detect and locate humans trapped under rubble in disaster zones. ◦ Implemented sensor triangulation to pinpoint survivor location; reached the Grand Finale of Smart India Hackathon 2025 as Team Lead. ◦ Selected DFRobot sensor modules and configured signal processing for reliable detection in cluttered rubble environments. ◦ Led a team through ideation, prototyping, and live demonstration rounds at the national finale.	Oct'25-Dec'25
17-DOF Humanoid Robot <i>Mechanical Design, Servo Control, System Architecture</i> Designed and built a 17-degree-of-freedom humanoid robot as part of an inter-hostel engineering competition at LPU. ◦ Engineered the mechanical linkages and joint layout to achieve 17 independent degrees of freedom. ◦ Won first place at the Inter-Hostel Science Day Competition at LPU.	Mar'25

TRAINING

LPU CATIA Training Learned 3D part modeling, assembly design, and technical drafting using CATIA V5. ◦ Applied CAD skills to design mechanical components for robotics prototypes, including chassis and gripper systems.	Jun'26
---	---------------

CERTIFICATES

• Machine Learning with Python - Level 1 IBM	Jul'2025
• Machine Learning with Python Etrain	Jul'2025
• Robotics Internship InternsElite	Feb'2024
• Creative Robotics Workshop Amrita Vishwa Vidyapeetham	Oct'2019
• Drone Summer Camp Fliege UAV Concepts Private Limited	May'2019

ACHIEVEMENTS

• Active Member — RISC (Robotics & Intelligent Systems Community): Contributed to the robotics community through collaborative projects, workshops, and knowledge-sharing sessions.	Aug'23-Present
• Smart India Hackathon 2025 — Grand Finale:	Dec'25

Selected at the national level as Finalist and Team Lead for the Disaster-Response Human Detection Device.

- **AIU Anveshan 2025 — North Zone:** Nov'25
Selected to represent the university and participated at the North Zone research & innovation competition.
- **Achiever Speaker — E&T Department:** Aug'25
Invited to deliver Induction Talk and Engineering Opportunities Talk to junior students at LPU.
- **1st Runner-Up — Picture Perception Competition:** Apr'25
LPU internal competition.
- **Winner — Inter-Hostel Science Day Competition:** Mar'25
Won first place for the 17-DOF Humanoid Robot project at LPU.
- **Robotics — Science City, Kapurthala:** Oct'24
Reached the Final Round in the RoboSumo event.
- **Cybersecurity Awareness Volunteer — HDFC Bank:** Oct'24
Delivered community awareness talks educating people on online safety, scam prevention, and digital financial security; work was featured in a local newspaper.
- **CodeStorm 36-Hour Hackathon — Finalist:** Sep'24
Reached the finals of a competitive 36-hour coding hackathon.
- **Binary Blitz — CELESTA IIT Patna:** Feb'24
Finalist at a national-level hackathon.
- **Content Manager — Autodesk Club:** Oct'23-Dec'23
Managed content creation and strategy — producing technical articles, tutorials, and design showcases for the club.

EDUCATION

Lovely Professional University <i>Bachelor of Technology - Mechatronics Engineering; CGPA: 6.56</i>	Phagwara, Punjab 2023 - Pursuing
Chinmaya Vidyalaya <i>Intermediate; Percentage: 66.6%</i>	Kannur, Kerala 2022
Thunchathacharya Vidyalayam <i>Matriculation; Percentage: 83%</i>	Kannur, Kerala 2020
